Why Posters212

Posters212 is a SaaS poster application providing pre-designed templates and intuitive tools to upload and share your content, research, papers, or product information with a few clicks and keystrokes. The application allows you to incorporate rich media and graphics to bring life to the knowledge sharing experience. With the addition of deploying our digital signage touchscreen boards at conferences, the speakers/authors are able to engage the audience and create a successful presentation experience.

Our solution offers many features including:

- Cloud service
- Pre-designed templates
- Pre designed processing menus
- Support for rich content - Event management
- Speaker/author management
- Speaker/author rating
- Poster rating
- Speaker/author profiles
- Usage reports
- Poster pre-formatted download
- All in one touchscreens
- Support, planning, training, and documentation

Inserting a slide converted into an image
The slide was created in MS PowerPoint

Designing Custom Posters Online In 3 Steps

CHOOSE A TEMPLATE
Choose from pre-designed & easy to use templates

Add Information
Add your text & rich content

Share Your Knowledge
Share content, research, data

Converting Slides into Images

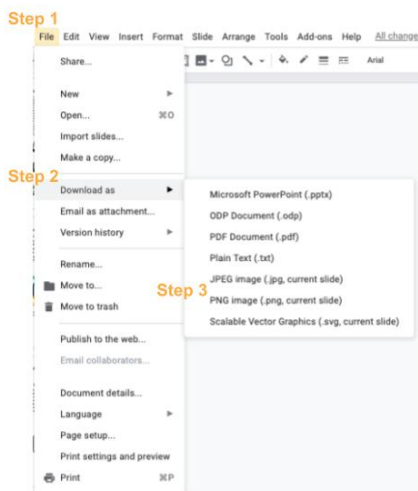

Once you are done with your slides, you can convert them to images. You can either save them as JPG or PNG. Both file formats are supported by the Posters212 application.

Step 1: Click File

Step 2: Click Download as

Step 3: Click either JPG or PNG

Note that Google Slides downloads one slide as an image at a time

Inserting "Converted Slides to Images" Into The Template

Once you have your slide (s) converted to images, you can simply use the Image icon in the template to insert.

You can create a slide for each box in the template, or you can insert multiple images (converted slides) into one box

Use the Image Tool to insert an image from your computer into the poster
